### **DETAILED ACTION**

1. In response to the Office action mailed on June 2, 2008 the Amendment has been received on September 2, 2008.

Claims 9, 12, 13, 15-17 have been amended.

Claim 20 has been canceled.

Claims 1-4 and 6-19 are currently pending in this application.

### ***Allowable Subject Matter***

2. Claims 1-4 and 6-19 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed because prior art fails to teach or make obvious an adjusting device for adjusting imaging parameters of an X-ray apparatus, comprising: a data processing device arranged to carry out calculation of adjusted imaging parameters of the X-ray apparatus, by use of which the visibility criterion is achieved for the given image region of interest and control of the X-ray apparatus on the basis of the calculated, adjusted imaging parameters, wherein the visibility criterion is the contrast-to-noise ratio of the image region of interest as claimed in combination with all of the remaining limitations of the claim.

Claim 9 is allowed because prior art fails to teach or make obvious an adjusting device for adjusting imaging parameters of an X-ray apparatus comprising: a data

Art Unit: 2882

processing device arranged to carry out calculation of adjusted imaging parameters of the X-ray apparatus, by use of which the predetermined visibility criterion is achieved for the given image region of interest; and control of the X-ray apparatus on the basis of the calculated, adjusted imaging parameters, wherein the device includes a detector for detecting changes in the imaging geometry and that the data processing device is arranged to adjust the calculated imaging parameters in the case of a change in the imaging geometry such that the predetermined visibility criterion is still achieved, and wherein the visibility criterion is a contrast-to-noise ratio of the image region of interest as claimed in combination with all of the remaining limitations of the claim.

Claim 10 is allowed because prior art fails to teach or make obvious a method for adjusting imaging parameters of an X-ray apparatus, comprising the following steps: calculation of adjusted imaging parameters for the X-ray apparatus, during the use of which a predetermined visibility criterion is achieved for a predetermined image region; and control of the X-ray apparatus based on the calculated, adjusted imaging parameters as claimed in combination with all of the remaining limitations of the claim.

Claims 2-4, 6-8 and 11-19 are allowed by virtue of their dependence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

4. Applicant's arguments, see pages 6-10, filed September 2, 2008, with respect to claims 1-4 and 6-19 have been fully considered and are persuasive. The rejection of claims 1-4, 6-9 and 11-19 has been withdrawn. Claim 10 is remaining allowable by virtue of their dependence.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Toth et al. (US Patent Application Publication 2004/0032928 A1), Bothe et al. (US Patent Application Publication 2003/0133534 A1), Ganin et al. (US Patent Application Publication 2002/0085672 A1) and Unger et al. (US Patent 6,501,819 B2) teach the X-ray imaging methods and apparatus designed to adjust the contrast to noise ratio.
